

Independent Candidate for  
Delegate to Congress.

**King S. Woolsey.**

Election November 5, 1878.

#### WHERE WE STAND.

We have been informed at other places in the Territory, that Maricopa county was the hot-bed of politicians, scheming for the location here of the Capital, Mint and other government institutions, but in the main this is incorrect. The people of this county are wide awake to their interests, and no man will be put on the ticket for delegate to the Convention, but those who have the welfare of Maricopa at heart, and all the schemes of chronic politicians will be dropped on election day. Strict party lines should not be drawn in the selection of county officers. Let good men be nominated, men who will be true to the interests of the county, honest and above suspicion, then we will have an honest administration of its affairs. Let the office seek the man not the reverse. The HERALD will not be the exponent of any ring, clique or scheme; it is not now nor will it be, pledged to the support of any legislative or county official, but will deal fairly by all, using its influence against corrupt office seekers.

#### OUR NEW BASE OF SUPPLIES

The Bulletin of June 28th contains a long article on the advantages of San Francisco as a trade center for the Territories and States of the Pacific Coast. We have heretofore looked upon her as the source from which all our commerce must come, but unless radical changes should take place in the reduction of freight tariff, she certainly will be the loser. Near our eastern line a railroad is being pushed toward Mexico, and in a short time, will be within 400 miles from the center of our Territory. The road from here to the end of that railroad passes through an agricultural country, while that to connect with the Southern Pacific is over a long dreary desert, feed scarce and water at long intervals. When the Atchison & Topeka railroad is completed to Los Vegas, St. Louis and Chicago productions can be landed here for 4½ and 5 cents per pound, while that from California costs from 7½ to 8 cents. The freight teams convey the goods from the railroad as cheap as is possible, but the rates on the railroad are exorbitant beyond measure. Unless California takes this matter in hand, and regulates the evil complained of, our trade will certainly come from the east. We have the richest mines on the coast, to develop which we require cheaper rates of freight, whether it be from St. Louis or San Francisco.

There is not a farmer in Salt River Valley, that owns a tract of land, who can with but little labor have a vineyard and orchard, that would, in the course of a few years net him quite handsomely. All the principal vineyards in California started from small beginnings, and now instead of having one acre, they run into the hundreds. An acre of vines produces about 500 gallons of wine, which would yield about \$750. Besides the profit on the crop the land is enhanced in value nearly two-fold.

Rain is anxiously looked for by the farmers in Agua Fria and other valleys to the north of Phoenix. The crops look well at present, but unless we have some moisture soon nothing will be gathered.

The bill doing away with that provision of the Resumption Act which required the cancellation of greenbacks when the new National Bank currency was issued, removes the last restriction upon the volume of currency. There is now no limit to the amount of paper money that may be put in circulation. The Silver bill will enable the Secretary of the Treasury, to place two millions of silver certificates on the market every month if the people ask for them, and all new bank circulation called for is so much added to the volume of paper. Let us hear no more about contraction, that is ruining the country.

Maricopa county is not only producing largely, the bread supply of the Territory, but promises soon to supply us with salt. Salt is extensively used in the reduction of base ores, and the supply needed comes from New Mexico. A specimen of the salt shown us from the Salt River Salt Company's Works, appears equal to the best manufactured. King S. Woolsey is President of the Company, Judge Cox, Secretary and Treasurer and G. S. Moon, Manager at the works. We are assured that this Company will soon manufacture all the salt the Territory requires. The works are about 125 miles east of this place.

We have received the Stockton Independent of June 15th. It is a double-sheet edition, giving a full history of Stockton and the great San Joaquin and Sacramento valleys. On the first page it has a colored map embracing those valleys. We commend the enterprise of the proprietors, and trust that their hopes may be realized.

The Commissioners of Internal Revenue declares, that the agitation in Congress over the reduction of the tax on whisky and tobacco, has caused a falling off in the internal revenue receipts for the present fiscal year, to the amount of \$10,000,000.

General Fremont is greatly gratified at his appointment as Governor of Arizona. He proposes to begin life anew in the distant Territory to which he has been commissioned.

The deliberations of the European Congress in Berlin are conducted in secret. But that will amount to nothing unless all the correspondents of American papers are driven out of the city and kept out.

The tobacco tax was not reduced but a great effort will be made to push the matter this summer and fall, so that the reduction may be accomplished as soon as Congress comes together again.

Beaconsfield, it is said, is to be created a Duke if he makes peace in Europe. What then should he be created if he succeeds in making peace in the English royal family.

Jenny Lind made \$1,000,000 by singing in America, and her husband has doubled it by judicious investments.

#### Hayden's Ferry.

A correspondent sends us the following items from that settlement:

Our national holiday was celebrated by a grand ball at the residence of Hon. C. T. Hayden, and dancing was kept up into the " wee sma hours," and was participated in by about 30 couples. Supper was served at midnight, and all enjoyed themselves.

A worthy gentleman of East Tempe, on the evening of the 6th inst., had a conflict with some one whom he thought was bent on mischief. Every motion he made was mimicked by the other. He then drew a pistol and fired three shots, when to his horror he found he had been shooting at his own shadow.

A Sheridan girl wants to be a lump-pot, because, you know, so many young men lug'em.

#### Remedy for Small-pox.

Dr. Farr, in a communication to the *Lancet*, states it as his opinion that body disinfection in the treatment of infectious fevers is not nearly so strictly observed by medical men as its importance demands, and calls attention to the great prophylactic value of rectified spirits of turpentine as an external application in small-pox. He states that it at once relieves any smarting or irritation, effectually corrects the unpleasant odor given off in the more confluent form of the disease, and seems in a marked degree to arrest pustulation, and so modifies to a great extent, and in some instances prevents entirely pitting. Its powerful antiseptic and disinfectant properties, too, are indisputable; and in this it possesses an additional advantage in preventing the spread of the infection. He used it with great success in the epidemic of 1871-2 and since then it has been used with most satisfactory results by others. It should be applied every night and morning by means of a feather, in the proportion of one part of the turpentine to four of olive oil. Dr. Farr believes that if this plan of antiseptic inoculation were carried out in all cases, the mortality from that loathsome and dreaded disease, small-pox, would be considerably reduced, and its ravages proportionately checked.

#### Upper Verde.

The Fourth of July was celebrated by the citizens of the Upper Verde in a reunion on the ranch of Mr. Campbell. There was a fine arbor constructed for the guests and under it dancing was indulged in. There were ten ladies and fifteen gentlemen present. Supper was served at midnight, where roast chicken and the smiles of pretty girls, made the bachelors appreciate the good things of Arizona. The Misses Latourette and Miss Gray were the bright particular stars of the evening.

Messrs Latourette and Belyea have the water on their ranches, in consequence of which their crops look fine.

A great many farmers are coming into the valley.

Crops look well, but rain is needed.

O. M. S.

#### Items from Yuma.

The *Sentinel* of July 6th, has the following items:

The Cocopah arrived on the 2d, with 19 bales of wool and 35 hides.

A printing press, type, etc., has arrived consigned to James Reilly.

The McCrackin mine shipped last week, 11 bars of bullion, worth \$14,023 and the Signal, 3 bars, \$1,500.

The steamer Mohave arrived on the 1st, with 101 sacks of ore from Castle Dome, and 68 bales wool.

The Prescott mail will be hereafter conveyed from Yuma.

Capt. Polhamus is stocking the Colorado with fish.

Judge Porter has been called to Los Angeles on account of the severe illness of his wife.

A man named F. Kiundlet, made several attempts to commit suicide last week.

#### Freight Facts.

The Yuma *Sentinel* of July 6th contains the following freight arrivals at that place destined for Phoenix:
